ALPINE STYLE

Premium Systems for Golf 7

Alpine introduces the 2nd generation Alpine Style system for the Golf 7: get perfect system integration in your Golf 7, paired with the latest features. Only Alpine offers the biggest screen size possible (9-inch), as well as extensive media options including Apple CarPlay and Android Auto and cutting edge iGo Primo Nextgen navigation. You also get high-end sound quality and sound tuning options with this great system.

Turn your dashboard into a high-end cinematic experience: the highlight of the Alpine system is the high-resolution 9-inch touch screen – the largest screen for a Volkswagen dashboard to date. In fact, it is more than twice as large as the standard 6.5-inch VW screen. This extra-large size display will amaze you by its brilliant, high-resolution image quality – you must see it to believe it.

With Built-in Navigation and Online Navigation Capability

**3 YEARS
FREE
MAP UPDATE**

X902D-G7 Premium Navigation System

Featuring built-in iGo Primo Nextgen navigation paired with TomTom maps and 3 years free of charge map updates, this unit is for Golf 7 drivers that need a reliable navigation system and often drive in other countries.

With Online Navigation Capability

i902D-G7 Premium Mobile Media System

Designed without built-in navigation, this system is for Golf 7 drivers that need navigation only from time to time and have a modern Android or Apple smartphone with data flat-rate.

Compatible	Golf 7 / GTI / GTD / R (AU) model year 2012 - 2016	Not compatible	Golf 7 GTE / eGolf / Sportsvan
------------	--	----------------	--------------------------------

Vehicle Integration

Steering Wheel Control Buttons

The Alpine systems are connected to your steering wheel control buttons. This means you do not lose this convenient feature when upgrading to Alpine and you will have full control over volume, phone, audio track forward/backward and many other commands. You can even activate Siri and Ok Google right from your steering wheel.

Driver Information Display

The small display in the instrument cluster is also connected to the Alpine system and can display radio station names, song titles and artist information, caller names, navigation turn-by-turn arrows and much more (except digital compass and phonebook).

Rear View Camera and Parking Sensors

If your car is equipped with original parking sensors and reversing camera, you can continue using these convenient features when upgrading to Alpine. The parking sensor system is connected to your Alpine screen, showing a useful distance guide and providing proximity sounds with automatic mute of the music when parking your car.

Compatible with Dynaudio Sound System

The Alpine Style systems are compatible with the Dynaudio sound system. All you need is the APF-H100DY interface that allows connection of your Alpine unit to the vehicle's MOST data-bus and you are ready to enjoy an audiophile sound experience. Note: the Fader function is disabled for technical reasons.

Vehicle System Setup

The Alpine systems are fully compatible with the Golf 7's electronic systems and can therefore display all menus and warnings (except original traffic sign recognition system).

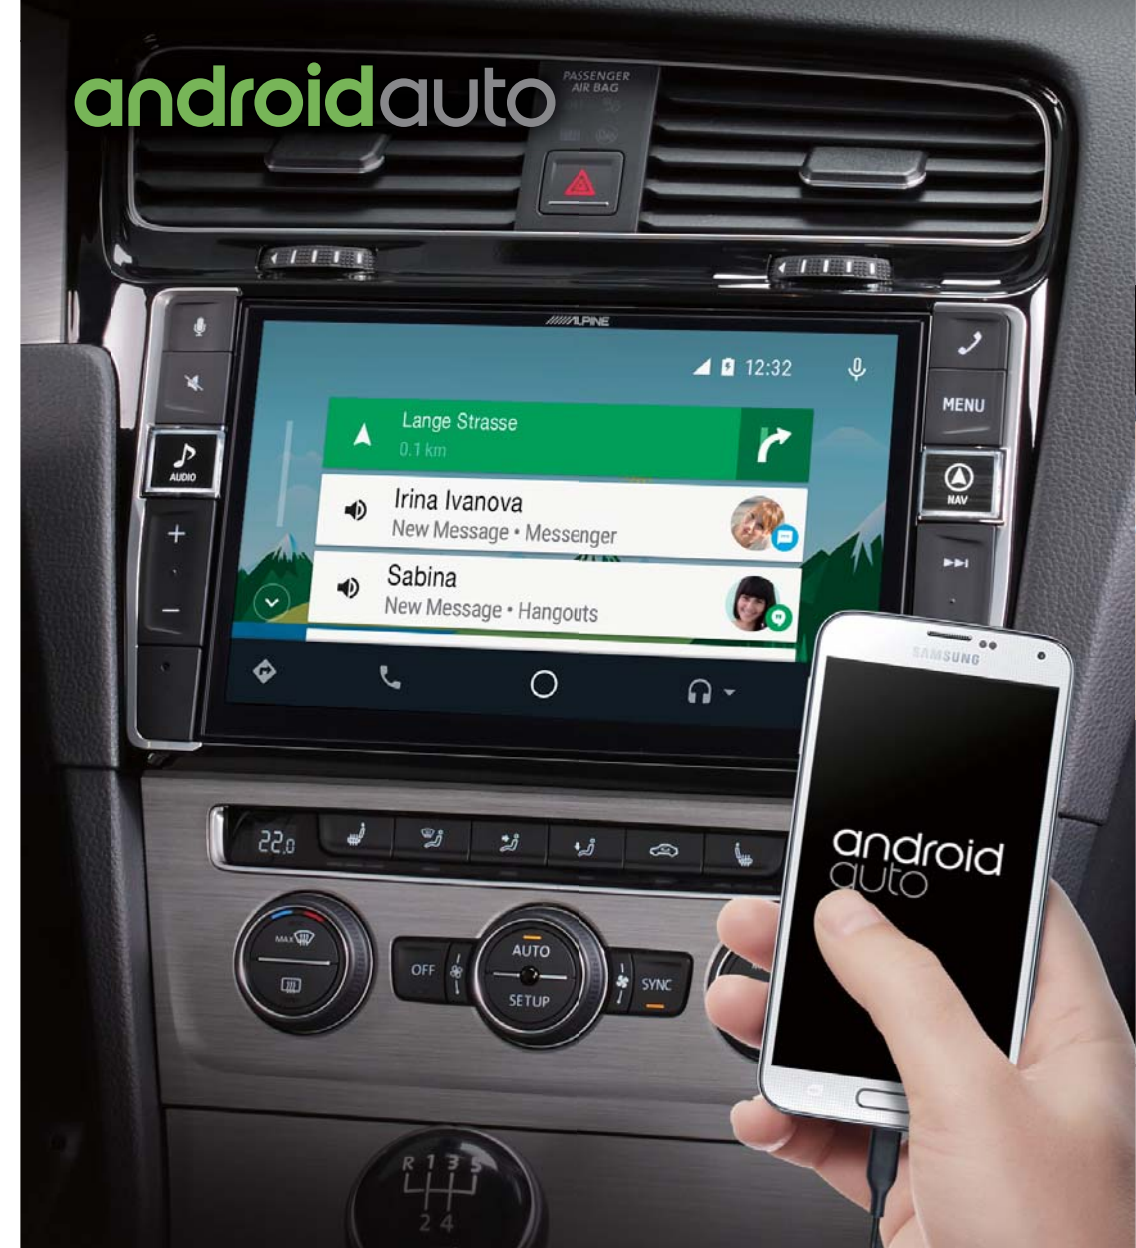

Apple CarPlay

The innovative Alpine Style systems for Volkswagen Golf 7 with Apple CarPlay bring you a smarter way to use your iPhone on the road. Apple CarPlay gives iPhone users an incredibly intuitive way to make calls, use Maps, and listen to music and access messages with just a word or a touch. You can even enjoy Spotify, internet radio or Podcasts while on the road for a truly connected experience.

Works with
Apple CarPlay

androidauto

Android Auto

Android Auto was designed with safety in mind. With a simple and intuitive interface, integrated steering wheel controls, and powerful new voice actions, it's designed to minimize distraction so you can stay focused on the road. Android Auto automatically brings you useful information, and organises it into simple cards that appear just when they're needed.

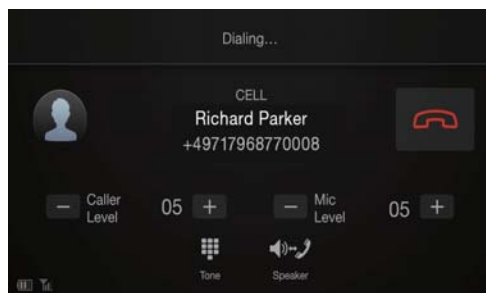

HDMI™ USB

Big Screen Entertainment

Both Alpine Golf 7 systems allow you to enjoy movies, music videos or TV shows from many different sources, such as DVDs from the optional optical drive, USB sticks, the latest smartphones with HDMI output or portable video devices (optional cables or adapters are required). You can also connect your iPod or iPhone to enjoy your video content on the high-resolution 9-inch display. For driving safety, the video playback feature is only available if the vehicle is not in motion.

Your Personal Media Expert

Built-in Bluetooth® Technology

The built-in Bluetooth® module allows wireless connection of a mobile phone for hands-free communication, while frequent software updates ensure full compatibility with the latest phones. A very intuitive user interface makes operation extremely easy. Bluetooth® also enables audio streaming from the phone: audio content or even internet radio can be wirelessly enjoyed on the Alpine systems.

Connect Your Smartphone

The Alpine systems are fully compatible with the latest smartphones such as the iPhone 7 / 7 Plus and the Samsung Galaxy S7 Edge. This offers many advantages: you can enjoy digital content stored on your phone such as music or video files, access your phonebook or simply charge your phone. You can even activate Siri and OK Google to voice-control your phone for maximum comfort and driving safety.

DAB Digital Radio

The built-in DAB/DAB+/DMB tuner uses the most advanced digital technology to deliver radio reception with outstanding, noise-free sound quality. DAB also offers many other advantages over traditional FM radio: choose from a much wider range of radio stations and after the initial station scan easily select your desired channels from an alphabetic or genre list of available stations.

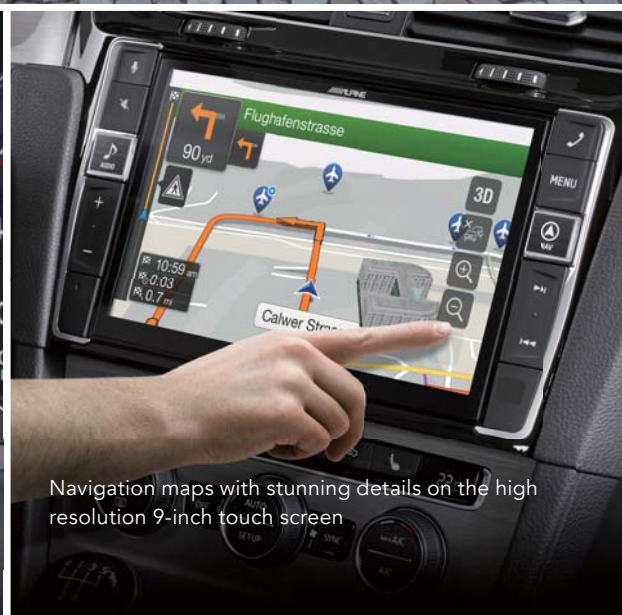

Optional DVD Player

Upgrade your Alpine Infotainment system with DVD and CD playback capability. The DVE-5300G fits perfectly in the Golf 7's original VW CD drive compartment in the glove box. It uses HDMI technology for stunning image quality and can be fully controlled from the touch screen. All installation parts are included.

Turn-by-turn guidance in multi-function display

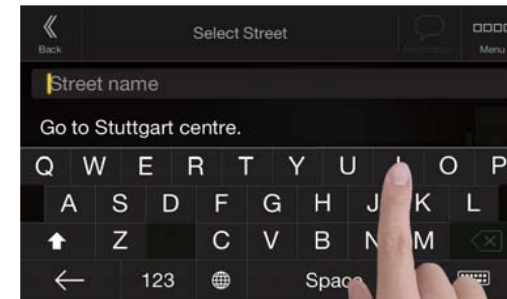

Navigation maps with stunning details on the high resolution 9-inch touch screen

iGo Primo Nextgen Navigation

The below navigation features apply only for X902D-G7 (and X902D-G6 for Golf 6).

High Resolution Touch Screen

Use the virtual keyboard to input destination addresses and operate all navigation settings. You can input postal codes for all European countries, which makes searching for addresses quicker. The system even reads partial addresses and you can select your own language from 33 different keyboards.

3D Maps

View maps in 3D with detailed buildings and landmarks. This feature helps you to better orientate yourself in large cities. Speed restriction display and speed camera warnings (not available for all EU countries) give you further driving assistance.

Lane Guidance / TMC Route Guidance

Lane Guidance lets the driver know which is the best lane to be in, while Dynamic TMC Route Guidance provides live traffic information for avoiding traffic jams and recalculates the route if necessary.

One Look Display

Alpine's innovative "One Look" split-screen technology allows you to view the navigation map and audio playback information at one glance. This eliminates the need to switch between different applications. You can switch from full screen to One Look view with just a swipe on the display.

Important Navigation Features

- Extensive map database of 48 European countries, 29 different GUI and voice guidance selectable
- Map updates can be purchased at any time online through alpine.naviextras.com
- Updates can be purchased by country and by region. This saves cost by updating only what is necessary.
- Address search with postcode input (includes 7-digit UK postcodes)
- Smart routes: the system database stores historic traffic patterns and uses them to choose the best route depending on the time of day and day of week
- High-resolution maps

Free-of-charge Map Update

Within the first 3 years after the navigation system's first GPS fix, you can go to www.alpine.naviextras.com to download new navigation maps fully free-of-charge. After that you can purchase map updates country by country or as packages based on your needs.

X902D-G7 Premium Navigation System

This version includes all media and connectivity options shown, such as Apple CarPlay and Android Auto, as well as a built-in iGo Primo Nextgen navigation system. This unit is recommended for drivers that use navigation often and for international trips.

Online Navigation

Both Apple CarPlay and Android Auto feature good navigation apps that can be displayed and controlled on the Alpine 9-inch display. This is especially interesting for drivers that need navigation only occasionally and can go without advanced functions such as Highway Mode and others. When using these navigation apps internationally outside your country, please note that data roaming costs will occur.

Maps : Apple CarPlay

When you're driving, Maps helps you find the way to your destination with turn-by-turn spoken directions and new, easier-to-read visuals. When a turn is coming up, the view zooms in to show you exactly where to go. Along the way, large signs and arrows guide you in the right direction and let you know how long it's going to take to get there. Looking for a gas station, restaurant, or coffee shop along your route? New buttons on the navigation screen help you quickly find the closest places and estimate how much time the detour will add to your trip.

Google Maps : Android Auto **androidauto**

You can use navigation in the Google Maps app to get turn-by-turn directions to places easily. Maps will show you directions and uses real-time traffic information to find the best route to your destination. With voice navigation, you'll hear traffic alerts, where to turn, which lane to use, and if there's a better route. If you're going where the Internet is slow, mobile data is expensive, or you can't get online, you can save an area from Google Maps to your phone or tablet and use it when you're offline.

GPS and Glonass Compatible

The X902D-G7 and the i902D-G7 come with a GPS/Glonass navigation antenna. Both Apple CarPlay and Android Auto apps can access the navigation signals for a good satellite reception and fast position fix.

Direct Online Navigation Access

The i902D-G7 has a large navigation button on the right key area. When pushed, the Alpine system automatically opens the navigation app - this works both with Apple CarPlay and Android Auto.

i902D-G7 Premium Mobile Media System

This version includes all media and connectivity options shown, such as Apple CarPlay and Android Auto, however excludes a built-in navigation system. Navigation can be used with Apple CarPlay and Android Auto, but international roaming cost may apply when using these navigation apps outside your county.

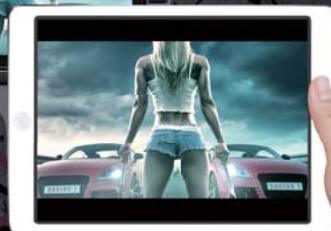

For Golf 6 and Cabriolet

The Alpine Style systems for Golf 6 include the same features and functions as shown on pages 2 - 7 in this catalog.

The Alpine Style system automatically starts up when you unlock your Golf 6. While the interior lights turn on, so does your Alpine system for a nice welcome to your ride and to be ready for operation when you put your Golf into gear.

When the first iPad was released, it was every installer's dream to put it in a dash. Having a 24cm x 17cm (9-inch) high res-screen in your dashboard is amazing. The Alpine systems have the same size as an iPad Air for a max "wow factor".

We offer a variety of start-up wallpapers for the Alpine Style systems – such as GOLF, GTI, GTD and R lettering. You can use any digital image in the correct size and simply upload it via USB to use it as start-up wallpaper.

6 cool facts about Alpine Style for your Golf 6

Activate SIRI or Ok Google without taking your hands off the steering wheel. iPhone users will love to simply dictate and send SMS messages, start phone calls or ask for any song stored on their phone by simply pushing a button on the steering wheel or the system, while Android users can activate Ok Google.

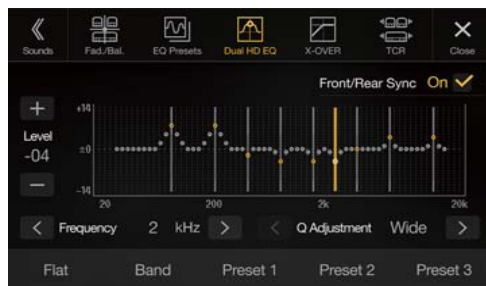

You can adjust the button illumination to six different colours (including VW red and clear white) and adjust in 2 brightness levels to match your taste. You can also select from different interface design styles, such as Sporty and Stylish.

Since your Alpine Style systems are fully connected to the engine control computer, you can even display turbo charger pressure on your 9-inch display (available only for vehicles with turbo charger).

The Party Starts in Your Golf

Professional Equalisation

The built-in Dual 9-band Parametric EQ allows separate adjustment for the front and rear channels with professional detail to find the best sound setting possible for your Golf.

Sound Pre-sets

10 pre-defined EQ settings allow for fast changing to different sound modes, such as Rock, Pop and Jazz.

X-Over

The digital crossover allows you to adjust cut-off frequencies for your speakers. This ensures a matching sound signal that can be accepted by your speakers without distortion.

Digital Time Correction

Time Correction allows you to virtually adjust the distance of each speaker by delaying the signals of speakers closest to you. This gives the impression of listening from a central position.

Subwoofer System for stealth installation

Improving the bass in your car usually means surrendering a lot of trunk space for a subwoofer box. Alpine solves this problem with the all-new SPC-600G7. This subwoofer system is designed to fit right into the spare wheel compartment of a Volkswagen Golf 5, 6 and 7, Scirocco, Polo and many other cars with a standard spare wheel compartment. The subwoofer comes pre-installed in a sealed enclosure and includes a compact amplifier and wiring kit.

Compatible with Dynaudio Sound System

The Alpine Style systems are compatible with the Dynaudio sound system. All you need is the KWE-DY01G6 interface that allows connection of your Alpine unit to the Dynaudio amplifier.

Trending Media

The Alpine Style systems for Golf 6 and 7 are compatible with FLAC Hi-Res Audio (24/96 and 24/192). You can also enjoy Spotify with Android Auto and Apple CarPlay for online music.

Accessories for Golf 7 and Golf 6

KAE-F2S Golf 6 Golf 7 DAB Antenna Adapter

Required to connect the original VW DAB antenna to the Golf 6 and Golf 7 Alpine Style systems.

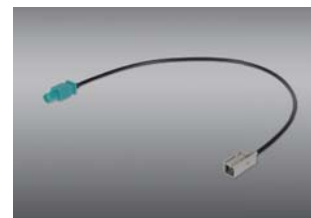

KAE-DAB1G6 Golf 6 KAE-DAB1G7 Golf 7 DAB Signal Splitter

Includes AM/FM & DAB active signal splitter, antenna adapter and all required cables. Required for cars without original DAB antenna.

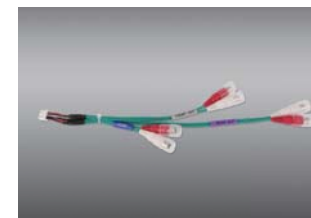

KCX-630HD Golf 6 Golf 7 HDMI Selector Interface

Allows connection of a second HDMI source to the Golf 6 and Golf 7 Alpine Style systems. Includes 1 HDMI cable.

KAE-F2GT5 Golf 6 Golf 7 GPS Antenna Adapter

Allows connection of the original VW navigation antenna to your Alpine Style system.

KTX-PRE1 Golf 6 Golf 7 PreOut Cable (6-Channel)

Required to connect external amplifiers to the Golf 6 and Golf 7 Alpine Style systems.

KCE-G7Qi Golf 7 LHD KCE-G6Qi Golf 6 LHD / RHD Wireless Charging Console

Allows charging of mobile phones with wireless charging function (Qi standard). Please visit your local Alpine website for more details.

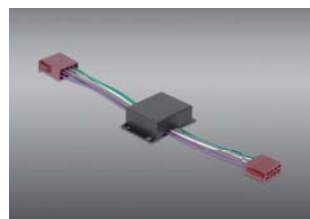

DVE-5300 Golf 6 DVE-5300G Golf 7 DVD / CD Player

Includes CD / DVD optical drive, HDMI cable, remote control and installation kit*. (*kit for Golf 7 only)

KWE-901G7MIC Golf 7 Microphone connection cable

Required for cars without original VW hands-free kit. Connects the Alpine Style system to the additionally installed hands-free microphone.

KWE-DY01G6 Golf 6 Dynaudio Interface

Required for connection of the Alpine system to a Golf 6 with Dynaudio Sound System.

APF-H100DY Golf 7 Dynaudio Sound Interface

To connect an Alpine Style system to Golf 7 with Dynaudio sound system.

SPC-600G7 Golf 6 Golf 7 Subwoofer System

Designed to fit in the spare wheel compartment of Golf 5, Golf 6, Golf 7 and many other cars with regular spare wheel compartment.
